PROFILE

Informatics undergraduate (7th semester, GPA 3.96) at Universitas Amikom Yogyakarta with hands-on experience building end-to-end software, from backend REST APIs (Node.js/Express, NestJS, Python/Flask) to AI/LLM-integrated applications and machine learning pipelines. Completed an internship at BPS-Statistics of Yogyakarta Municipality, supporting statistical data processing and day-to-day operations in a government institution.

Structured, detail-oriented, and a fast learner, with a habit of understanding the problem and user flow before writing code. Open to roles in software engineering, backend development, or AI/ML engineering.

EXPERIENCE

BPS-Statistics of Yogyakarta Municipality Aug 2026 – Oct 2026
Intern – Statistical Data Processing & Operations Support Yogyakarta

- Contributed to statistical data processing at the municipal office of Indonesia's national statistics agency, entering and validating records from source documents so datasets were accurate and ready for further processing.
- Applied data-quality checks by cross-referencing entries against source documents and identifying inconsistencies for correction, helping maintain the reliability of official statistical data.
- Provided cross-functional support to multiple work units, handling data compilation, document management, and administrative operations.
- Handled a wide range of assignments from staff across teams, managing shifting priorities and deadlines while adapting quickly to government work standards and procedures.

EDUCATION

Universitas Amikom Yogyakarta 2023 – Present
B.S. in Informatics, Faculty of Computer Science | 7th Semester | GPA: 3.96 Yogyakarta

- Relevant coursework: Algorithms, Software Engineering, Database Systems, Machine Learning, Artificial Intelligence, Web Programming, Data Mining, Big Data.
- Focus areas: web development, backend systems, data analytics, machine learning, and applied AI.

SMA Negeri 1 Depok 2020 – 2023
Science (MIPA)

PROJECTS

NOVAÉ – Digital Fashion Commerce Platform 2026
Independent Developer | React · TypeScript · NestJS · Prisma · PostgreSQL · Supabase Auth | GitHub repository

- Built a monorepo with a bilingual (ID/EN) editorial storefront, an admin back office, and a NestJS REST API.
- Applied server-authoritative pricing, atomic inventory reservation at checkout, and role-based access control verified against the database.
- Added a payment simulator (Virtual Account, QRIS, card) so the full order lifecycle can be demonstrated safely.
- Covered the system with 200 automated tests: 105 unit and 95 end-to-end.

SIMO Mugi Jaya – Operational Information System for CV Mugi Jaya 2026

Full-Stack Developer, 5-person Scrum team, client project | React · Vite · Express · PostgreSQL | GitHub repository

- Analyzed the client's production-to-delivery workflow and modeled it with PlantUML use case and activity diagrams before implementation.
- Built frontend and backend features for production monitoring, warehousing, quality control, logistics, and reporting.
- Implemented a digital QC checklist with photo evidence as a shipping gate, plus live GPS delivery tracking with a route simulator.
- Secured the system with JWT role-based access control and a full audit trail of operational changes.

NEST – Household Finance Platform 2026

Independent Developer | React · TypeScript · NestJS · Prisma · PostgreSQL · Redis · Docker | GitHub repository

- Applied double-entry bookkeeping to personal and family budgeting, with integer-cent amounts to avoid rounding errors.
- Built multi-account, multi-currency (IDR, USD) ledgers shared across a household with Owner, Admin, Member, and Viewer roles.
- Added budget envelopes with rollover tracking and savings goals with deadline projections.
- Secured accounts with Argon2id hashing, TOTP two-factor authentication, Redis-backed sessions, and audit logging; containerized with Docker Compose and verified with GitHub Actions CI.

Sehatara – AI-Based Health Web Application 2026

Independent Developer, Capstone | React · Vite · TypeScript · Gemini API (LLM) | GitHub repository

- Integrated the Gemini API for AI-powered health Q&A, using prompt engineering and structured JSON output to keep responses safe and contextual.
- Designed an AI workflow from symptom input to LLM reasoning to structured output through REST API and JSON handling.
- Developed symptom logging, medication notes, recovery planning, and a calming space, with LocalStorage-based persistence.

Lithium-Ion Battery RUL Prediction – SVR + Deployment Dashboard 2026

Independent Developer | Python · Scikit-learn (SVR) · Flask | GitHub repository

- Built an end-to-end ML pipeline predicting Remaining Useful Life with Support Vector Regression (RBF kernel) on the NASA Battery Aging Dataset.
- Engineered 31 trend-aware features and applied Leave-One-Battery-Out validation, reaching R^2 0.91, MAE 7.55 cycles, and RMSE 9.19.
- Deployed a Flask dashboard for replaying real NASA cycles and simulating custom battery parameters.

CERTIFICATIONS

Google Gemini AI Developer Jul 2026

SmartBridge Indonesia

Certificate of completion for the LastMile 2026 Bootcamp (Mar–Jun 2026), covering LLM fundamentals, prompt engineering, and application development with the Gemini API.

Deploy Multi-Agent Architectures Jun 2026

Google | Verify credential

Designing and deploying AI agents and multi-agent architectures on Google Cloud.

Develop GenAI Apps with Gemini and Streamlit Skill Badge Jun 2026

Google | Verify credential

Building and deploying generative AI applications with Gemini and Streamlit.

Inspect Rich Documents with Gemini Multimodality and Multimodal RAG Skill Badge Jun 2026

Google | Verify credential

Multimodal prompting with Gemini and retrieval-augmented generation (RAG) over rich documents.

Prompt Design in Vertex AI Skill Badge Mar 2026

Google | Verify credential

Prompt design and generative AI workflows on Vertex AI.

Cisco Certified Network Associate Apr 2025

Cisco

Networking fundamentals, including IPv4 and IPv6 addressing.

ORGANIZATIONS & ACTIVITIES

AMCC (Amikom Computer Club) 2023 – 2024

Member Yogyakarta

- Joined a technology and programming community within Informatics to keep learning, discussing, and growing technical skills.

Volleyball Competition

Organizing Committee

- Prepared the competition schedule in Excel, including duty rosters, referee assignments, and group draws.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL

Frontend: React, Vite, HTML, CSS, Tailwind CSS

Backend & Databases: Node.js, Express, NestJS, Flask, FastAPI, REST API, Prisma, PostgreSQL, Redis

Data & Machine Learning: Pandas, NumPy, Scikit-learn, XGBoost, PySpark, Jupyter Notebook

AI & LLM: Gemini API, Vertex AI, prompt engineering, multimodal RAG

Tools & Practices: Git, GitHub, GitHub Actions (CI/CD), Docker, VS Code, Scrum, PlantUML

Languages: Indonesian (native), English (fluent)
